Cleaning process

Regularly use a soft brush or vacuum to remove surface dust and marks. For more stubborn dirt use a damp microfibre cloth and water, working in a circular motion. Do not rub vigorously as this may damage the surface. Do not machine wash. Avoid any contact with bleach based cleaning agents as this can cause significant damage to the fabric.

Bakau fabrics are not suitable for piping.

This product is not suitable for use in spa or swimming pool areas where contact with chlorine is possible.

Boulevard

The Boulevard collection consists of 2 designs: a sophisticated chevron and a small scattered check, available in a range of contemporary colours to add an elegant finishing touch to contract interiors.

By skopos

FR Upholstery fabrics for contract interiors

Boulevard

Flame retardant to Crib 5

Facets of metallic yarn glint in contrast to a soft chenille and a natural matt backdrop, adding texture, warmth and a contemporary flavour.

contract upholstery

Palais Galleries

The definite chevrons of metallic yarn strike a bold path across the horizontal chenille yarns in the Palais design, mimicking architectural detailing and structure. In contrast Galleries provides a small scale scattered check, little windows of woven detail, in 3 complementary yarns.

Cleaning process

Regularly use a soft brush or vacuum to remove surface dust and marks. For more stubborn dirt use a damp microfibre cloth and water, working in a circular motion. Do not rub vigorously as this may damage the surface. Do not machine wash. Avoid any contact with bleach based cleaning agents as this can cause significant damage to the fabric.

TESTING

Regularly use a soft brush or vacuum to remove surface dust and marks. For more stubborn dirt use a damp microfibre cloth and water, working in a circular motion. Do not rub vigorously as this may damage the surface. Do not machine wash. Avoid any contact with bleach based cleaning agents as this can cause significant damage to the fabric.

Cleaning process

- Regular vacuuming and light brushing will help maintain the fabric appearance.
- Wipe clean with damp cloth using warm water for most stains.
- Remove spillages promptly.
- For protein stains, cold water should be used to remove any soiling, then use dilute bleach (5% sodium chlorite) as a useful disinfectant.
- Ensure residue cleaning chemical is removed from the surface.
- Do not machine wash, dry clean or tumble dry.

NB before starting stain removal it is advised to always check the suitability of any cleaning fluid by applying to an area of the fabric out of sight.

Upholstery Cleaning process

Regularly use a soft brush or vacuum to remove surface dust and marks. For more stubborn dirt use a damp microfibre cloth and water, working in a circular motion. Do not rub vigorously as this may damage the surface. Do not machine wash. Avoid any contact with bleach based cleaning agents as this can cause significant damage to the fabric.
